

Title

TREATMENT OF INFLAMMATORY, CANCER, AND THROMBOTIC  
DISORDERS

5 Abstract of the Disclosure:

This invention provides for the treatment of inflammatory, cancer and thrombotic disorders through the administration, in combination, of a COX2 inhibitor, low dose aspirin, and antioxidant flavanoids, flavonoids or isoflavones and at least one of these combinations will be given in a subtherapeutic amount for improved anti-  
10 inflammatory , anti-cancer, and anti-thrombotic efficacy and safety.
